Re: Beenu Arya

I am writing this letter in strong support of Beenu Arya, whom I have known for over 12 years. The first medical facility she designed for us was Windsor Surgical Centre in 2002. The facility included a state of the art operating room and challenge was to work with the limited space and providing a smooth patient flow. Beenu was able to co-ordinate with several surgeons and vendors and came up with a design that is still working with great efficiency. Windsor Surgical Centre is an accredited facility.

Beenu has designed several other centres for us, all of them extremely unique; however, they offer the same patient flow efficiency.

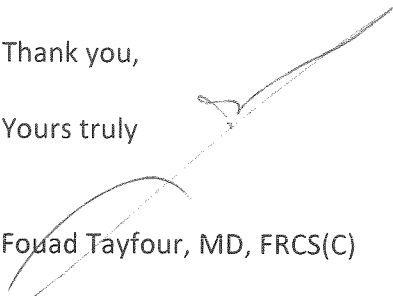

The last facility Beenu designed for us was Burlington Laser Eye Centre in 2014. The space was initially rejected being too small and too narrow. When Beenu looked at the space, she mentioned that she can work with it. And she did come up with the most economical and efficient plan. The facility was finished and was in operation in less than four months. The surgeons using the facility admired the work of Beenu by providing more medical projects.

Professionally speaking Beenu is very detail oriented and mindful of the client's needs. She understands medical facilities very well as she takes care of patient's flow and surgeon's needs. She also co-ordinates well with all the trades and the college to make sure that everything is done as per the specific requirement. She has always finished her projects before time and under budget.

I will highly recommend Beenu for design of any medical facility. I wish her all the success.

Thank you,

Yours truly
